

Features & Benefits

VPA SERIES

Features	Real life usage and Benefit
Stream high quality music from any existing PC	Save on purchasing conventional CD or Digital source players, stream music directly from any PC to the Network power amplifier.
Curate and create multiple custom playlist	Organize the music to suit your business or shops' outlook effectively. Select the playlist via the PC or remotely from our free App.
Time schedule and automate the music playlist selection	Enhance Customer experience - Ensure the music playlist is suitable during specific times of the day (ie; morning/midday/night playlist). Ultimately create a more conducive environment for your customers to shop, dine or patronage your business.
Time schedule staff reminders and announcements	Create a more efficient workforce - utilize the software to time schedule reminders and announcements to the staff.
Time schedule announcements to the customers	Increase sales - Utilize the software to time schedule promotional messages on special offers to the customers in store.
Wireless App Paging	Provide quicker response - Remotely call for staff assistance in store or communicate with your customers about special offers – without the need to physically walk to a desktop microphone.
Remote volume control of the network power amplifiers via WiFi	Quick easy access and control - Ensure the background music is a soothing level and announcements can be heard loud and clear all at your fingertips
Text Streaming (TTS) Paging – Utilize the app to type a sentence and it will be automatically converted to voice announcements.	Clear concise announcements every time! Even when making announcements from a noisy environment, Text Streaming (TTS) Paging gets rid of any unwanted background noise. TTS Paging also ensures the voice is consistent for every announcement.

Application & Features

How can we help enhance a restaurant?

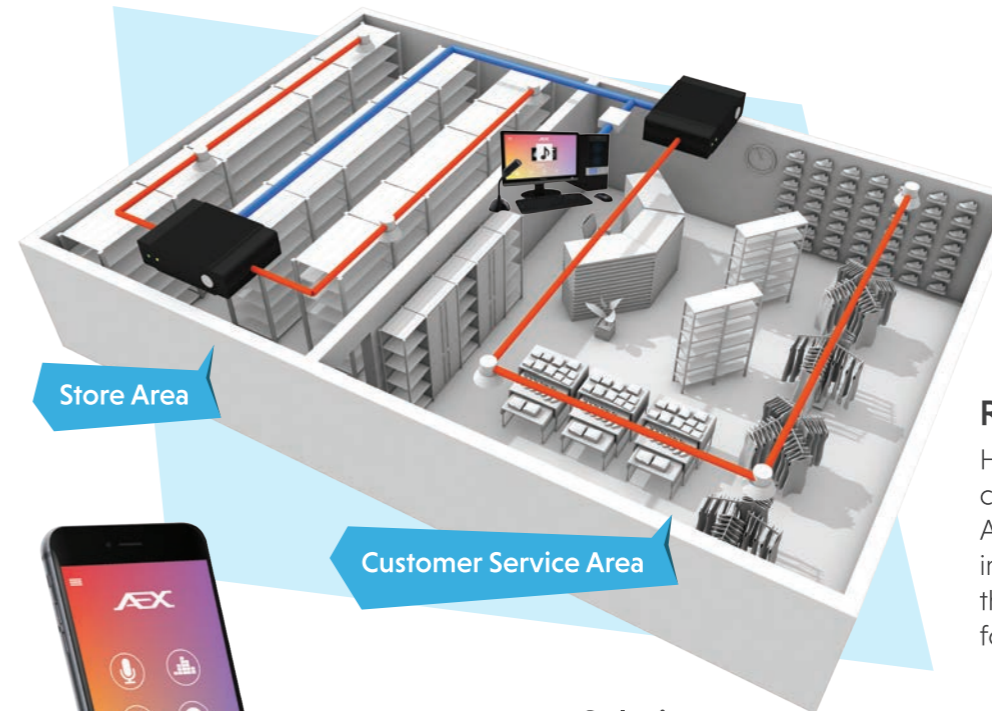

Requirement

High quality music to complement the café/restaurant theme and ensure the customers have a more enjoyable experience.

Solutions

Organize and stream music to our Network Power Amplifier. Select the playlist via the PC or remotely from our free App. Ensure the music playlist is suitable during specific times of the day (ie; morning tunes/midday Jazz/Dinner playlist).

How can we help enhance Business Premises

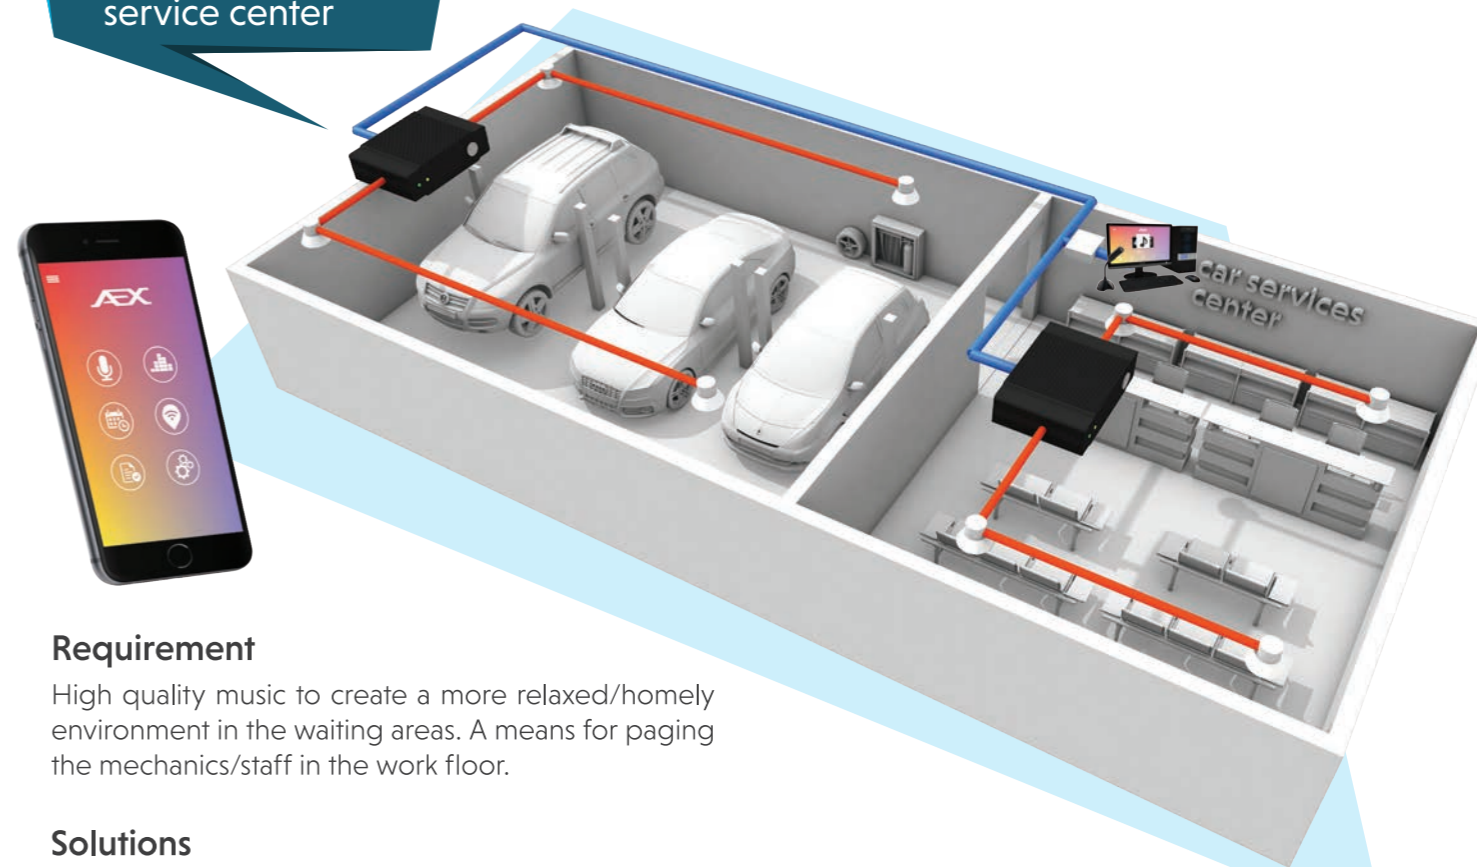

Requirement

High quality music to create a more conducive environment to shop. Announcements to promote certain in-store products. A means for paging the staff in the back of house to call for assistant.

Solutions

Organize and stream the music to the Network Power Amplifier in the customer service area. Create an additional zone by having a Network Power Amplifier unit in the back-of-house area. Make announcements to the staff via our PC paging software or our VPA App. Use the VPA software to broadcast time scheduled promotional announcements throughout the day.

How can we help enhance a Car service center

Requirement

High quality music to create a more relaxed/homely environment in the waiting areas. A means for paging the mechanics/staff in the work floor.

Solutions

Organize and stream music to our Network Power Amplifier in the customer waiting area. Create an additional zone by installing a Network Power Amplifier unit in the workshop area. Make announcements to the mechanic staff via our PC paging software or our VPA App.
